THE SEASON FOR
REBOUND PHENOMENON

Dear Doctor:

During the cold and flu season, you are likely to see more cases of the rebound phenomenon due to excessive use of topical decongestants.

The first thing many people do when they catch cold is to start using a decongestant spray. For a time they feel better but after a while, their noses may seem more clogged than before. Finally, they come to you for help.

Unlike topical decongestants, AYR Saline Nasal Mist and Drops may be used by people of all ages including infants and children. It safely provides moisture necessary to thin secretions and soothe membranes irritated by colds, allergies, nose bleeds and environmental dryness. It can also be used by pregnant women who should avoid drugs.

Another pad of AYR recommendation sheets is enclosed for your convenience.

Sincerely,

Joan Bowen-Nash
